Intervals

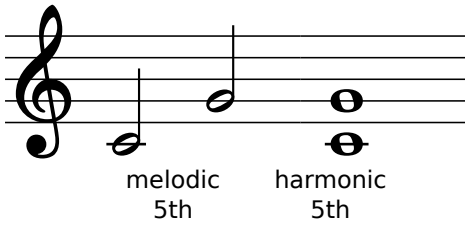

An **interval** is the distance between two notes. To find the **interval number**, count the letter names from the lower note to the upper note, counting both. C to E is C, D, E: three letters, so it is a **3rd**. Two notes on the same line or space form a **unison**; eight letters, such as C to the next C, form an **octave**.

Intervals above C4, from a 2nd to an octave.

Melodic and harmonic intervals

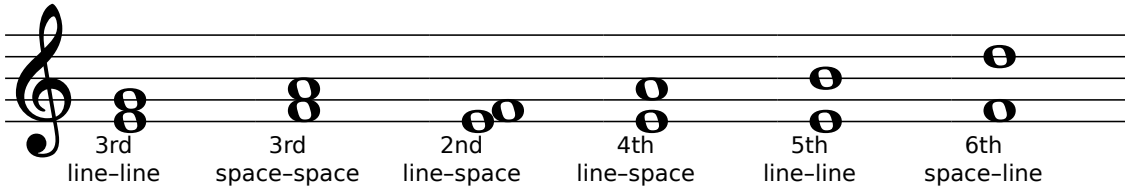

A **melodic interval** has its two notes played one after the other. A **harmonic interval** has its two notes played together, written one above the other. Both are measured the same way.

Reading intervals on the staff

The staff shows interval numbers by pattern, so letter names are not always needed:

- Odd-numbered intervals (3rd, 5th, 7th) have both notes on lines or both notes in spaces.
- Even-numbered intervals (2nd, 4th, 6th, octave) have one note on a line and one in a space.
- A 2nd is written with its notes side by side, touching, when they sound together.

Accidentals do not change the interval number. C to E♭ is still a 3rd, because it still spans three letter names. Chapter 16 shows how half steps tell two 3rds apart.

Name _____ Date _____

Interval Numbers

A. Harmonic intervals Write the number of each interval: 2nd, 3rd, 4th, and so on.

EXAMPLE 1. 2. 3. 4. 5. 6. 7. 8. 9. 10.

3rd _____ _____ _____ _____ _____ _____ _____ _____ _____ _____

B. Melodic intervals Write the number of each melodic interval in the bass clef.

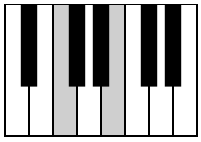

EXAMPLE 1. 2. 3. 4. 5. 6. 7. 8. 9. 10.

3rd _____ _____ _____ _____ _____ _____ _____ _____ _____ _____

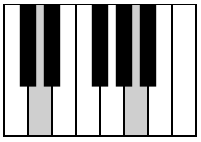

C. Intervals on the keyboard Count the letter names from the lower shaded key to the upper one, and write the interval number.

EXAMPLE

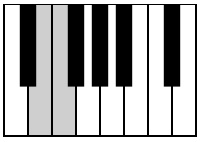

3rd

1.

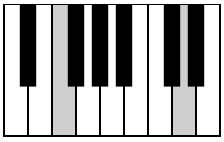

_____

2.

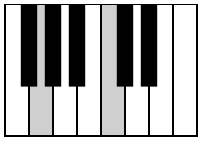

_____

3.

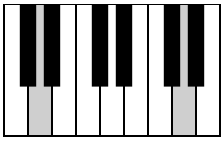

_____

4.

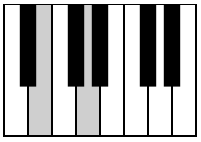

_____

5.

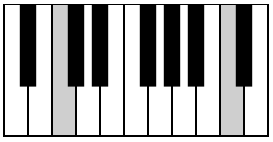

_____

6.

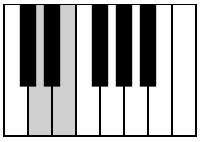

_____

7.

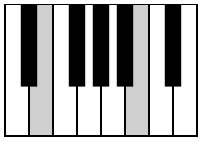

_____

8.

_____

9.

_____

D. Line or space Write line or space to complete each sentence.

EXAMPLE A 3rd up from a line note ends on a: line

1. A 4th up from a line note ends on a: _____
2. A 5th up from a space note ends on a: _____
3. A 2nd up from a line note ends on a: _____
4. A 6th up from a space note ends on a: _____
5. A 7th up from a line note ends on a: _____
6. An octave up from a space note ends on a: _____
7. A 3rd up from a space note ends on a: _____
8. A 4th up from a space note ends on a: _____
9. A 6th up from a line note ends on a: _____

Name _____ Date _____

Writing Intervals

A. Interval numbers Write a whole note above each given note to make the interval shown. Use letter names only; no accidentals.

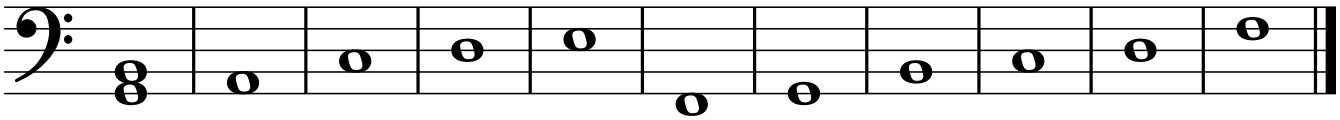

EXAMPLE 1. 2. 3. 4. 5. 6. 7. 8. 9. 10.

3rd 5th 2nd 6th 4th 3rd 5th 7th octave 4th 5th

B. Interval numbers in the bass clef Write a whole note above each given note to make the interval shown. Use letter names only.

EXAMPLE 1. 2. 3. 4. 5. 6. 7. 8. 9. 10.

3rd 5th 2nd 6th 4th 3rd 7th 3rd octave 5th 2nd
